FLÚÐIR

Velkomin – Welcome

Flúðir er vaxandi þéttbýliskjarni og miðstöð menningar, þjónustu og félagslífs á svæðinu. Dugmikið fólk er uppspretta fjölbreytts athafnalífs og þar er gott að vera. Jarðhiti er mikill á svæðinu. Jörð er frjósöm, óþrjótandi uppspretta af heitu vatni og landið ákjósanlegt til landbúnaðar og ræktunar. Fjöldi garðyrkjubýla er í sveitinni, landbúnaður, iðnfyrirtæki og vaxandi þjónusta. Á sumrin er hitastig oft hátt og veðursæld mikil.

Flúðir a growing community is the centre of culture, service and social events in the area. Productive people are the source of varied businesses. There is a great deal of geothermal heat in the area. The soil is fertile, abundance of hot water and the land ideal for farming and cultivation. There are numerous horticultural farms in the region along with agriculture, small industries and increasing services. During the summer the temperature is often high and the weather very mild.
